# Md Yeasin Sheikh

✉ yeasinsheikh50@gmail.com  in linkedin.com/in/mdyeasinsheikh  ⌗ github.com/yeasin50

**Freelance** — Aug 2021 – Present
*Software Engineer* — *Remote*
- Developed and maintained over 10 projects across healthcare, e-commerce, real estate, and government services, ensuring user-centric and high-quality solutions.
- Led feature development, bug hunting, and post-deployment enhancements for projects such as DataHub, Demand Here, IDSDP, and FamilyTree, improving app stability and performance.
- Built and deployed the Moneybag Flutter package, a leading payment gateway in Bangladesh, integrating multiple payment methods and optimizing transaction workflows for security and user convenience.
- Fostered strong client relationships by delivering on-time solutions, maintaining clear communication, and providing ongoing support.

**NDA (Part-time)** — Feb 2025 – Present
*Flutter Developer*
- Refactored legacy Flutter codebase to improve performance and maintainability, while contributing new features to the production app at a London-based company.

**Tincleo (Contract Role)** — Dec 2023 – Nov 2024
*Flutter Developer* — *Cameroon*
- Developed a cross-platform real estate app enabling seamless property transactions (renting and buying) with advanced search and filtering functionalities.
- Integrated dynamic features allowing users to request properties and property owners to post listings, enhancing user interaction and engagement.
- Ensured platform security by implementing user verification, scam alerts, and a review/rating system, providing a secure and trustworthy experience for all users.

## Projects

**Read me when** — Dec 2024
- Led and built an open-source app that displays Quranic verses for emotional and spiritual support.
- Added verse-sharing to help users connect and uplift each other.
- Designed a minimal, calming UI for a peaceful user experience.

**Locato** — Nov 2023
- Refactored the entire Flutter codebase to boost performance and simplify future maintenance, enabling a smoother release cycle.
- Resolved critical bugs across the app to ensure a stable user experience during cross-border rental searches (US–France).
- Enhanced code readability and app structure, improving developer onboarding and collaboration efficiency.

**DIU Result** — Dec 2023
- Developed the DIU Result app for Daffodil International University, automating mark-sheet retrieval and reducing a 3-day delay and 50 BDT fee.
- Implemented offline access and grade analysis features, enabling students to compare their performance with peers and make informed decisions.
- Introduced a course selection feature for retakes, further improving the app's value in enhancing the student experience and accessibility.

## Achievements

- Earned a reputation of 63.9k+ on Stack Overflow with 3.5k+ solutions, reaching over 2.9 million developers, and awarded 7 gold badges for excellence in contributions, including Flutter and Dart.
- Certified in FlutterDevcamp State Management by Google Developer Group, London.
- Foundations of User Experience (UX) Design by Google.
- Completed the Microsoft Asia Virtual Experience Program in Engineering (Undergraduate & Masters).

## Technical Skills

**Languages:** Dart, GoLang (Intermediate), SQL
**Frameworks & Libraries:** Flutter, Serverpod, Melos, InheritedWidget, Riverpod, BLoC, Gin
**Technologies:** Git, Firebase, Rive, Figma, CI/CD, Trello, Docker
**Concepts:** API, Object-Oriented Programming, Clean Code, Collaboration, Project Management

## Education

**Daffodil International University** — Sept 2023
*Bachelor of Science in Computer Science (GPA: 3.67 / 4.00)* — *Dhaka, Bangladesh*
